

MOTORIZED SHARPENING MACHINES

Our sharpeners feature a sturdy and resilient structures, designed to meet your needs. They are available for the following materials:
COPPER, HIGH AND LOW-CARBON STEEL

Our sharpeners are capable of overcoming all sharpening difficulties thanks to the sharpener rollers, made from the best materials and according to our own exclusive design, they are fitted with motors and gearmotors of the best internationally renowned brand names which means that you can be assured that wherever you use our machines you will get the best assistance and a **RELIABLE FUNCTIONAL GUARANTEE!!!**

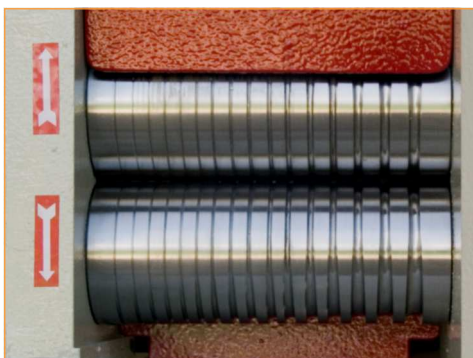

FEATURES

<i>Standard painting fixed parts:</i>	<i>RAL 6011</i>
<i>Standard painting protections:</i>	<i>RAL 1007</i>
<i>Power supply:</i>	<i>380/400 V. 50/60 Hz.</i>
<i>Motor power:</i>	<i>1,5 kW</i>
<i>Total weight:</i>	<i>165 Kg.</i>

SHARPENING FEATURES

<i>Copper:</i>	<i>Ø 4,00 ÷ 0,70 mm.</i>
<i>Low carbon steel:</i>	<i>Ø 4,00 ÷ 0,70 mm.</i>
<i>Sharpening rollers diameter:</i>	<i>66 mm.</i>
<i>Sharpening rollers speed:</i>	<i>60 rpm</i>

ACCESSORY MACHINES FOR DRAWING

The AP 1 sharpener range thanks to their large dimensions are easy to handle, and stable on use thanks to their two braked wheels; the sharpener roller being made from the best hardened and ground steel. Their sturdy structure has been developed to handle a full range of demanding operating conditions, so that they are resistant to both dust and dirt.

WITH AN EYE TO SAFETY!

Thanks to ongoing collaboration with draw plate constructors and with the actual drawing mills have led to improvements both in the field of production and SAFETY.

The sharpening operations have been made safe thanks to sturdy guard elements that have been designed to protect the fingers.

So that there are no longer operations involving risk to health and safety, our machines assuring total practical functionality and user ease, and of course total SAFETY.

Another important safety device is the switch which acts to disconnect the machine in the event of even a temporarily power failure, so that there is no risk of accidental start ups when the power returns.

FUNCTIONAL GUARANTEE

All our sharpeners are tried and tested by our engineer who act both to monitor the correct function as well as the actual sharpening results on various types of materials.

The motors and garmotors fitted on our sharpeners are amongst the leading internationally renowned brand names, which means that users are assured of GUARANTEED assistance wherever our machines are used.

Our production range not only includes sharpeners but machine tools for drawing such as:: wire unwinding platforms, un-winders, automatic flaking devices, dandy rollers, winders, reel winders and more.

Our machines are the result of the ongoing experience of those that actually use them in the drawing fields. The result is that this experience combined with high-tech design and construction means that our machines are safe and reliable in all aspects.
